

The central purpose is the creation of linkable, open data describing historical locations in Surimanga. This data will include:

- Spatial coordinates (latitude/longitude)
- Spatial geometry (points, polygons geometry collections, bounding boxes)
- Timeframes (dates and date ranges)
- Feature type (e.g., village, farm, ward, ...)
- Other feature information and attributes (e.g., place names, addresses, building types, etc.)

Data will be made available on different formats.
